

Telecom - Bluetooth™ Family

Bluetooth™ USB modem: the ideal and easy to use tool for all your communication needs.

No need to use a cable: COM One Bluetooth™ USB offers you to share your data with others Bluetooth™ devices (as PC, PDA, Access Point...) immediately and easily.

Without any cable and particular configuration, transfer your files quickly and securely or surf and use your favourite applications on the internet.

The COM One Bluetooth™ USB is the ideal tool for the business road warriors; wherever you are, stay in touch with your company network.

The COM One Bluetooth™ USB is approved and fully compliant with Bluetooth™ Products of the major manufacturers.

Applications

Access to the internet and corporate network: at your office or at home, wirelessly through the access point, connect to the internet or intranet of your corporate and get the information you need (the stocks or the last sales report).

Access to the GSM/GPRS network: during a business trip, connect your notebook to your Bluetooth™ handset in order to download your e-mails or to surf on the Internet.

Synchronization: coming back from a business trip? Synchronize with one click your PDA to your PC to update your address book, calendar, etc.

File transfer: transfer your files without any cable and any configuration.

Printer: at the office or at a customer site, print your documents wirelessly.

COM One Bluetooth™ USB is provided with a software allowing a complete management of Bluetooth™ GSM handset: contact management, SMS, fax, e-mail, instantaneous access to the GPRS network.
